Advanced: For customers with large/complex deployments seeking advanced, full featured networking technology to drive competitive advantage with lower cost of ownership.

Essential: For customers seeking essential proven technology that's affordable and easy to use while providing scalability for future needs.

Value: For value-conscious customers seeking reliable and easy-to-use connectivity solutions.

Security: For companies that require world-class network Security solutions to proactively stop threats and deliver business continuity

Note: "x" in a product series name indicates multiple series numbers are available
