

## HP ProCurve MSM317 Access Device

---

### **Businesses face choices every day, why not make one simple?**

Embrace the HP ProCurve MSM317, a unique, in-wall device that centralizes wired and wireless connectivity, giving businesses flexible mobility regardless of connection.

Used with an HP ProCurve MSM controller, experience a secure, easy-to-use device backed by HP quality and a one year warranty.

The HP ProCurve MSM317 Access Device is a revolutionary new way of delivering 'quad play' services to hospitality and residential properties. Designed to eliminate complexity and cost without compromising the user experience, the HP ProCurve MSM317 Access Device is the ultimate solution for service providers and property owners seeking to deliver high value IP-based services to their customers.

### **The HP ProCurve MSM317 Access Device provides:**

- Single radio, 802.11 b/g (2.4GHz) wireless Access Point
- Powered by and passes through POE
- Four 10/100 Ethernet ports (one with PoE)
- Pass-through RJ-45 connection for service and user connectivity
- Unique in-wall design
- Reduced installation costs

### **Ideal for deployment in:**

- Hotels
- Conference Facilities
- University and College Residences
- Healthcare Facilities
- Any location that requires maximum connectivity
